Massachusetts College of Pharmacy and Health Sciences Selects Occupational & Environmental Health Network to Provide Employee Health Services

Marlborough, MA, -- June 5, 2008 -- Occupational & Environmental Health Network, Inc. (OEHN) has signed an agreement with Massachusetts College of Pharmacy and Health Sciences (MCPHS) to provide a variety of employee health services within the area of Occupational Medicine. This initiative will be directed by OEHN's Chief Medical Officer, Thomas H. Winters, MD.

The program's core goal is to assist in optimizing health and reducing risk for MCPHS personnel working in the Animal Care Program. Some of the services that OEHN will provide include: diagnosis of work related injuries and diseases, vaccine requirements, medical evaluations and respirator fit testing for Animal Care Program covered personnel. OEHN will also assist MCPHS with the development, review and approval of policies and procedures related to their Animal Care Program.

"We are confident that OEHN will deliver an optimal service delivery model. This program will supply a heightened level of safety and improved occupational health care within our Animal Care Program," said, John Tummino, Director of Environmental Health & Safety, Massachusetts College of Pharmacy and Health Sciences.

"We look forward to enhancing the value of the Massachusetts College of Pharmacy and Health Sciences Employee Health Program. Our service delivery competencies are a strong fit with the Massachusetts College of Pharmacy and Health Sciences program requirements," said OEHN's Thomas H. Winters, MD.

About Occupational & Environmental Health Network – OEHN delivers premier onsite Medical Director leadership and program oversight for employee and occupational health departments across the country. OEHN is supported by a team of Board Certified Occupational Health physicians, program management staff, project managers and consultants. Its network of twelve hospital clinics and a local, regional and national network of occupational medicine resources provide organizations, hospitals, disability management providers and the government with a comprehensive portfolio of occupational medicine solutions.
