

Educational Series

An Occupational and Environmental Health Network Educational Event

Ergonomic Improvements in a Challenging Economy How low-cost ergonomic improvements can decrease costs while increasing safety and productivity in your workplace.

Sponsored by:

**Occupational & Environmental Health Network (OEHN)
and PSAssociates Ergonomic**

Presented by:

**Terry Snyder, MBA
Owner and Senior Consultant PSAssociates**

At this educational event, Terry will provide helpful ideas on how to implement successful, cost-effective ergonomics initiatives in your workplace, to prevent disability and improve productivity. Using examples from over 20 years of experience, she will address some common myths that prevent companies from implementing these programs. In these challenging economic times, when employees are asked to do more with fewer resources, good ergonomic practices are important to keep employees productive.

Speaker Biography: Terry Snyder has been an ergonomics consultant for over 20 years. Her company, P.S. Associates, LLC, helps clients develop innovative ergonomic solutions that decrease risk of injury while improving productivity, quality, and costs. Ms. Snyder consults to a wide variety of workplace environments including office, laboratory, university, and industrial settings. Ms. Snyder's publications have focused on organizational issues related to successful implementation of ergonomic interventions. They include *Business Analysis in Occupational Health and Safety Consultation*, Journal of Occupational Medicine Oct 1991; *The Organizational Response - Influence on CTDs in the Workplace* and *Under-Reporting of Work-Related Upper Extremity Disorders*, *Ergonomics*, 1999.
